### **General features**

- Magnetic distance and angle measuring system in compact design; with programmable measuring display and integrated magnetic sensor.
- Sensor and electronics are protected by a robust aluminium housing.
- Simple mounting; directly (bracket) or with mounting bracket.
- In combination with an incremental magnetic tape (PM5) or a magnetic ring (MRI), a cost-effective and flexible solution to detect linear and rotational movements.
- The measuring system is powered by a ½AA 3.6V battery uninterrupted for approx. 4 years.
